Summitworks Technologies Inc.

WHO WE ARE

SOFTWARE DEVELOPMENT AND CONSULTING FIRM

SummitWorks Technologies, Inc. is a global IT Solutions Provider specializing in: Full Life Cycle Project Based Consulting, Selective Outsourcing, and Premium Workforce Solutions. Headquartered in South Plainfield, NJ, SummitWorks supports IT initiatives in Software Application/Product Development, Application Re-engineering, Project Management, and Application Maintenance & Support.

With software development centers in United States and offshore, and through onsite consulting, SummitWorks provides IT services to clients from coast to coast in the USA. Our highly experienced professionals solve variety of complex problems for the clients, and are involved in developing solutions from concept to reality, utilizing latest technologies and creative algorithms.

THE OPPORTUNITY

LEARN WITH PROS AND BUILD YOUR CAREER IN THE MOST LATEST & VERSATILE TECHNOLOGIES

As a leader in software development and consulting services, SummitWorks has hired and trained thousands of individuals for internal and consulting assignments over the past eighteen years. Having decades of experience and expertise in full software development life cycle, we understand what skills are required to shine as a seasoned professional. As the demand for latest IT skills continues to grow, we are offering the same training in a boot camp format in collaboration with BrightRace Institute of Technologies combining advanced training and software development expertise.

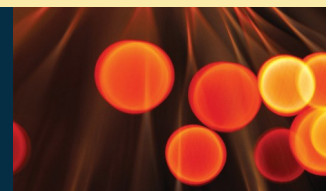

Students get an opportunity to work and practice in live development project environment enabling them to go beyond the academic knowledge and get equipped to handle real-time projects successfully right out of training.

Learning at SummitWorks is not just a training, it's a life changing experience. Each program is complete and designed to get you on a job as soon as you finish your training. You'll learn all the necessary technologies and skills to launch a rewarding career. If you are not afraid of technology and have a basic aptitude in mathematics and science you can become a highly successful IT professional. All it takes is determination and the right career partner. We at SummitWorks not only provide the training, we ensure your success by assisting you in resume building and interviewing skills.
